Chemi Nutra's Phosphatidylserine (PS) Approved OU Kosher

White Bear Lake, MN – Chemi Nutra proudly announces that the Union of Orthodox Jewish Congregations of America, Kashruth Division (OU), has granted Kosher certification for their SerinAid® 20F PhosphatidylSerine (PS) used in foods, functional foods, medical foods, and dietary supplements, following rigorous completion of OU's review and audit services. This prestigious certification indicates that this highly respected specialty PS ingredient complies with Kosher dietary laws, restrictions, and regulations as determined by OU, and that it will be accompanied with the OU symbol at all times.

PS is considered the safest, most scientifically studied natural nutraceutical in existence, for maintaining and improving cognitive abilities – concentration, learning, memory, recall, and focus – as well as benefiting dementia, mood, stress, and behavioral attention deficits. And, PS has been granted two qualified health claims by the FDA, related to cognitive dysfunction and dementia in the elderly.

"We have been very impressed by the professionalism exhibited by the people at OU throughout this entire certification process, and we are very excited to be able to offer an OU Kosher certified PS to our customers in the food and nutrition marketplace", said Scott Hagerman, president of Chemi Nutra.

Chemi Nutra is the US business unit of parent company Chemi S.p.A., a privately held pharmaceutical and nutraceutical company based in Milan, Italy. Chemi, with cGMP certified manufacturing facilities in Italy and Brazil, is best known in the US nutritional arena for its introduction of phosphatidylserine (PS) and alpha-glyceryl phosphoryl choline (A-GPC).
